

GI problems are not normal.

Many horses suffer from from gastro-intestinal issues, yet many horse owners write it off to their horse just being a "finicky eater". If your horse eats well one day and not the next, that's your first clue that your horse may have ulcers or other GI problems. The good news is that you may not need to resort to drugs to help your horse correct this problem. Check with your veterinarian, and then try Oxy-Gen Xtreme GI Care™.

Oxy-Gen Xtreme GI Care™ is a revolutionary supplement designed to assist in balancing stomach pH and create an optimum environment for digestion and feed utilization. We begin with Oxy-Gen Xtreme™, our special blend of MSM and glucosamine combined with the original Oxy-Gen® formula. We then add a select group of vitamins, minerals, yeasts, and probiotics which act in concert to create the optimum environment for proper digestion and assist the GI tract in healing itself naturally.

In the years since its introduction, Oxy-Gen® has become the trusted edge that Champions across America depend on to increase stamina, improve respiration, cut recovery time, and help develop superior muscularity. And now with Oxy-Gen Xtreme GI Care™, you can get your horse's digestive system in the same Champion condition too! You should pick up some Oxy-Gen Xtreme GI Care™ today!

"After being scoped and diagnosed as having ulcers, we put SL Hellbender on Oxy-Gen Xtreme GI Care. He has been much more relaxed and quieter because his ulcers are not bothering him, and has also put on weight. We had used another more expensive ulcer treatment on him but we like the results we have seen using the Xtreme GI Care. I have had my horses on the Oxy-Gen products and really like the fact that the Xtreme GI Care is combined with Oxy-Gen Xtreme."
