

Sho-Flow with LOX™

(Liquid Oxy-Gen™)

Oxy-Gen™ is the formula that revolutionized the livestock industry. It has become the benchmark by which all other supplements are measured. No other supplement on the market can boast Oxy-Gen™'s proven track record in the show ring, and year after year, Oxy-Gen™ users sweep the major shows and small-town fairs across America.

Oxy-Gen™ is a natural product derived from wheat germ extract which was developed in 1995 by Dr. Jack McEowen, Ph.D. Noting the effects of this derivative in humans, he instantly saw the potential for livestock and performance horses. He redesigned the formula for animals and in 2000 introduced the original Oxy-Gen™ livestock formula. It immediately caught the attention of show people and breeders, and by the end of the 2000 show season, it was apparent that animals fed Oxy-Gen™ had consistently outperformed their competition in muscling, weight gains, hair quality, general soundness, and overall health.

The Nevin Family of Spring, Texas
English Breed Champion Heifer, Overall Reserve Champion,
and Champion Scrambled Calf, Harris County Fair, 2000
Reserve Champion Senior Heifer (Open Show), and
Champion Senior Heifer of the Junior National Show,
National Western Stock Show, Denver, 2002

Sho-Flow™ is the original Oxy-Gen™ formula suspended in a light soybean oil. This liquid formula is both easy to use and highly palatable, and is readily accepted by any animal. As a liquid, dust is eliminated, so Sho-Flow™ is excellent for animals with sensitive respiratory systems or respiratory issues. Sho-Flow™ will increase weight gains, enhance muscling, improve hair quality and lustre, and give your animals the bloom and vigor that only comes with the original Oxy-Gen™ formula.

- ➔ SUPERIOR MUSCLING
- ➔ IMPROVED HAIR QUALITY
- ➔ EXCELLENT WEIGHT GAIN
- ➔ ENHANCED BLOOM AND VIGOR
- ➔ SAFE, NATURAL, & DRUG-FREE

SHO FLOW™

with
