

Take your performance to the highest level possible!

TAKE NO PRISONERS!

The first equine product with

CIRCQLATE™
technology!

Take No Prisoners!™ represents the new standard in performance supplements for equine athletes and it incorporates cutting-edge nutritional technology to build better horses. We started with our Oxy-Gen Xtreme GI Care™ formula, our special blend of yeasts, probiotics, vitamins, and minerals, designed to balance stomach pH and create the optimum conditions for proper digestion and nutrient consumption. Next, we added the original Oxy-Gen® formula that Champion competitors have relied on for years for superior muscling, enhanced respiration, increased stamina, and faster recovery after exertion. Champion competitors from every sport and discipline know the difference that Oxy-Gen® makes in their horses, and time after time, horses fed Oxy-Gen® consistently win the major shows and small-town jackpots across North America.

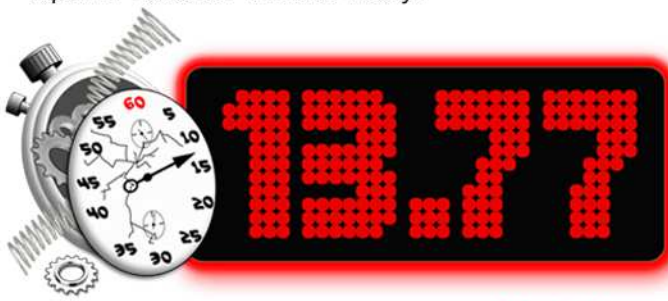

Emerging research in equine health demonstrates that if your typical 1,000 pound horse has an oral intake of 10,000 mg (10 grams) of glucosamine hydrochloride on a daily basis, it will slow down the degeneration of cartilage and even help repair cartilage in conjunction with other traditional therapies. Glucosamine has been shown to have anti-inflammatory effects, as well as being a precursor molecule for rebuilding cartilage.

Take No Prisoners!™ incorporates the MAXIMUM recommended amount of glucosamine HCl for performance horses to keep your horse's joints in top condition and ready to win! Glucosamine HCl is readily available to your horse's cells; studies have shown that up to 95% is absorbed and metabolized for rebuilding cartilage. We also add MSM to help fight off cell damage from free-radicals and reduce inflammation and soreness after training or competition.

And now for the TRULY groundbreaking news! We have adapted our exclusive CircQlate™ technology for use in performance horses! Based on cutting-edge human nutritional technology, CircQlate™ enhances bloodflow, thereby speeding nutrients and the original Oxy-Gen® formula to every cell of your horse's body. The result is that you will see definite improvements in DAYS, not in weeks like inferior supplements, and you will see tremendous results with continued use!

Does Take No Prisoners!™ really work? Just ask Sheri Sinor Estrada of Alamogordo, New Mexico. While testing the prototype of the Take No Prisoners!™ formula, she took the Sissy Thurman Fast Time Award at the 2005 Las Vegas NFR, turning in a BLISTERING time of **13.77 seconds** on the last day of the show!

You should find out what your competition already knows! Pick up a pail of Take No Prisoners!™ today!

Developed in conjunction with **World Barrel Racing PRODUCTIONS**
