

The original Oxy-Gen™

Oxy-Gen™ is the formula that revolutionized the world of performance horses. It has become the benchmark by which all other supplements are measured. No other products on the market can boast Oxy-Gen™'s proven track record on the track and in the arena, and year after year, Oxy-Gen™ users sweep the major shows and small-town events across America.

Oxy-Gen™ is a natural product derived from wheat germ extract which was developed in 1995 by Dr. Jack McEowen, Ph.D. Noting the effects of this derivative in humans, he instantly saw the potential for livestock and performance horses. He redesigned the formula for animals and in 2000 introduced the original Equine Oxy-Gen™ formula. It immediately caught the attention of barrel racers, and by the end of the year, it was apparent that horses fed Oxy-Gen™ had consistently outperformed their competition, developed better muscle structure, and recovered quicker after competition. Soon competitors from other disciplines discovered the Oxy-Gen™ difference, and now Oxy-Gen™ is used by winning riders in English, Roping, and even Hunter/Jumpers and Polo Ponies!

Dr. Jack McEowen, Ph.D.
creator of Oxy-Gen™

Equine Oxy-Gen™ is a pelleted product designed with the horse's sensitive respiratory system in mind. Pellets are hand-screened to remove fines and dust and won't contribute to any respiratory issues like a dusty meal can. Equine Oxy-Gen™ is highly palatable and readily accepted by even the most finicky of eaters. Adding Oxy-Gen™ to your horse's feed regimen will improve vigor, build muscle, enhance breathing, and cut recovery time. Oxy-Gen™ is the winning edge used by Champions across America!

Guaranteed Analysis:

Crude Protein, min	16.0%
Crude Fat, min	2.0%
