

Are breathing problems holding you back?

Oxy-Gen® is the formula that revolutionized the world of performance horses. It has become the benchmark by which all other supplements are measured. No other products on the market can boast Oxy-Gen's® proven record on the track and in the arena; and year after year, Oxy-Gen® users sweep the major shows and small-town events across America.

Oxy-Gen® is a natural product derived from wheat germ extract which was developed in 1995 by Dr. Jack McEowen, Ph.D. Noting the effects of this derivative in humans, he instantly saw the potential for livestock and performance horses. He redesigned the formula for animals and in 2000 introduced the original Equine Oxy-Gen™ formula. It immediately caught the attention of barrel racers; and by the end of the year, it was apparent that horses fed Equine Oxy-Gen™ consistently outperformed their competition, developed better muscle structure, and recovered quicker after competition. Soon riders from other disciplines discovered the Oxy-Gen® difference, and now Equine Oxy-Gen™ is used by winning riders in English, Roping, Reining, Cutting, and even Hunter/Jumpers and Polo Ponies!

Dr. Jack McEowen, Ph.D.
creator of Oxy-Gen®

Oxy-Gen 2X™ is specially formulated with **DOUBLE** the Equine Oxy-Gen™ formula and is intended for horses in need of special help. It is particularly useful for horses with heaves, COPD, allergies, and other respiratory issues. Oxy-Gen 2X™ is also excellent for use in horses with bleeding issues. Oxy-Gen 2X™ is a pelleted product designed with the horse's sensitive respiratory system in mind. Pellets are hand-screened to remove fines and dust and won't contribute to any respiratory issues like a dusty meal can. All Oxy-Gen® products are highly palatable and readily accepted by even the most finicky of eaters. Adding Oxy-Gen 2X™ to your horse's feed regimen will improve vigor, build muscle, enhance breathing, and cut recovery time. The original Oxy-Gen® formula is the winning edge used by Champions across America!
