

# Xtreme performance begins with a healthy horse.

To be a consistent winner, your horse must be in top condition inside and out. Among the most common ailments afflicting performance horses are gastro-intestinal issues like colic and ulcers. If your horse is prone to colic, can't maintain weight, or "acts nervous", those are symptoms of an underlying digestive issue, but now you can help improve these symptoms naturally, safely, and without drugs. Using Oxy-Gen® products that contain our exclusive GI Care™ formula is the first step to a healthier horse. Start with our new JailBreak GI™, a gelatinized paste designed specifically to help balance the pH of your horse's digestive system while boosting performance. Just one 20cc application contains electrolytes, lactobacillus, and other probiotics, as well as our exclusive GI Care™ formula of special buffers that soothe gastric distress and help balance stomach pH. These special buffers in JailBreak GI™ can serve as a non-invasive test for ulcers or pre-ulcerous conditions. If your horse performs better after using JailBreak GI™, that is a strong indication that you should add Oxy-Gen Xtreme GI Care™ to your feeding program.

Oxy-Gen Xtreme GI Care™ balances stomach pH and creates the optimum environment for proper digestion and nutrient absorption. The GI Care™ formula works quickly to soothe digestive system issues and helps your horse to heal itself naturally and without potentially dangerous drugs. And both JailBreak GI™ and Oxy-Gen Xtreme GI Care™ contain the original Oxy-Gen® formula, the formula that top competitors have trusted for years to improve stamina, muscling, and respiration. The Champions across North America count on Oxy-Gen®. Shouldn't you?

## JAILBREAK GI™

and

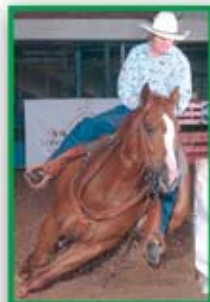

**OXY-GEN Xtreme™**  
**G.I. CARE**

"After being scoped and diagnosed as having ulcers, we put SL Hellbender on Oxy-Gen Xtreme GI Care. He has been much more relaxed and quieter because his ulcers are not bothering him and has also put on weight. We had used another more expensive ulcer treatment on him but we like the results we have seen using the Xtreme GI Care. I have had my horses on the Oxy-Gen products and really like the fact that the Xtreme GI Care is combined with Oxy-Gen Xtreme."
