

This is what we mean by Xtreme performance!

"I found that using Jailbreak GI paste effectively controls ulcers in my horses. It also acts as a preventative to keep them from coming back." Terri Kaye Kirkland

"If your horse eats better and performs better after using JailBreak GI, there is a strong possibility that your horse has ulcers or a pre-ulcerous condition. Oxy-Gen products that contain our GI formula like JailBreak GI and Oxy-Gen Xtreme GI Care were developed specifically to balance stomach pH and create the proper environment for optimum nutrient absorption, and to help your horse heal gastro-intestinal issues naturally and without drugs. If you have questions, please call us toll-free and talk with our highly qualified staff, or please feel free to call me personally at (800) 799-9981."
